ABOUT ME.

Motivated developer eager to gain experience, contribute to challenging projects, and deliver high-quality work in a team environment.

EDUCATION.

King Mongkut's University of Technology Thonburi 2019 - 2023
Bachelor of Science
Department : Computer Science (English Program) (CS)

EXPERIENCE.

Frontend Innovasive.
Nov 2024 - May 2026

Fullstack Nextzy.
May 2024 - Aug 2024

Frontend Devcula.
Jan 2023 - Jan 2024

Fullstack Ookbee. U
Jun 2022 - Dec 2022 (Intern)

SKILLS.

Programming Languages: TypeScript | JavaScript

Frontend: React | Next.js | React Native | Material UI | Tailwind CSS | Ant Design | Axios | Valtio | Formik | Yup | classNames | clsx | React Query | Lodash | Recharts | Font Awesome | GIS Map | HTML | CSS

Backend: Node | Express | Nest | SQL | NoSQL | MySQL | PostgreSQL

Development: VS Code | Git | GitHub | GitLab | Postman | REST APIs | Antigravity
Design: Figma
Database: MySQL | PostgreSQL | DBeaver | NoSQL Booster
Infra / Backend: Docker | TypeORM | Linux | Ubuntu VM
Collaboration & Communication: Jira | Bitwarden | Terminus | Miro | Discord | Telegram

CERTIFICATE.

• NVIDIA DLI Certificate Completion: Foundation of Deep Learning.
• CITI program: Human Subjects Research (HSR) and BioMed-Social Sci Basic Course.
• Kaggle certificate: Introduction to machine learning.

PROJECTS.

Polling & Voting Application

- Developed a versatile polling engine supporting multiple formats: single-choice, multiple-choice, and open-ended (free-text) responses.
- Integrated social engagement features, including real-time liking and commenting systems to foster user interaction.
- Optimized data fetching and server-state synchronization using React Query for a smooth user experience.
- **Technologies Used:** React, Next.js, TypeScript, Material UI(MUI), React Query.

Electronic Document Management System
A high-scale digital transformation platform for complex administrative workflows.

- Complex Workflows: Engineered a multi-tiered approval system with digital signatures and automated document forwarding using Valtio.
- Custom Editor & Verification: Developed a Lexical-based rich-text infrastructure with dynamic markers and secure QR Code verification.
- AI Automation: Integrated AI-powered tools for intelligent form-filling and automated content summarization to drive efficiency.
- Data Analytics: Architected interactive dashboards using Recharts and D3.js for real-time organizational data insights.
- Next-Gen Tech: Leveraged React 19 and Tailwind CSS v4 to deliver a high-performance and future-proof user experience.
- **Technologies Used:** React 19, TypeScript, Vite, Tailwind CSS v4, Valtio, TanStack Query, Axios, Lexical Editor, D3.js, Recharts, Formik/Yup

Financial Management Platform
A large-scale financial system for a major national utility organization.

- Automated Onboarding: Built a seamless enrollment flow with integrated risk assessment and investment profiling.
- AI-Driven Operations: Implemented AI features for document management to automate and reduce administrative overhead.
- Modern Architecture: Developed a high-performance, responsive UI using React and Tailwind CSS v4 for thousands of users.
- Reactive Logic: Managed complex financial data states using Valtio to ensure real-time consistency and maintainability.
- Technologies Used: React, TypeScript, Tailwind CSS v4, Valtio, TanStack Query, Axios
